12 years
building and testing web products

Full-stack engineer who builds web software and makes sure it keeps working. I took a UK and European rowing marketplace from an empty repository to a working prototype, built with AI coding agents, and at QA Wolf I wrote and ran 450+ Playwright tests across three client accounts. I look past the interface at the data model and the integrations, where the real problems start.

Looking for full-stack engineering roles: TypeScript, React / Next.js and Node, with testing built in (Playwright, CI/CD) and AI-assisted engineering. Also open to AI quality work: testing AI-assisted software. Rowing Exchange is a part-time project, evenings and weekends; I'm available full time.

Work, by the numbers.

Five clients at QA Wolf, 2024 to 2026: three accounts of my own, Figma and Drata after hours

CodeRabbit
200
Playwright tests
Onboarded the account

feefo
200+
Playwright tests
Onboarded the Feefo account

Lifesum
50+
mobile Playwright tests
Onboarded the Lifesum account

Figma
After hours
Playwright investigation
Failures looked into the same night

Drata
After hours
Playwright investigation
The main trusted support point of contact

Before QA Wolf: **15+** Shopify websites, The Chris Moyles shop among them; **20+** WordPress websites, Stanleybet among them.

I build web software.
12 years
building and testing web products

I test it.
5 clients
Figma, Feefo, CodeRabbit, Drata, Lifesum

I find what breaks.
Why did it fail?
I reproduce the hard cases and separate product defects from automation problems.

I ship a marketplace.
Rowing Exchange
a marketplace, from an empty repository to a working prototype

The story so far.

Today first, then back to the start.

2026 — **Co-founder, Founding Engineer** Now
Rowing Exchange · UK · 2026 to now · since October
Built from an empty repository to a working marketplace, with Claude Code and AI coding agents. Private beta with UK sellers in 2027.

2024 — **QA Automation Engineer 2**
QA Wolf · promoted in October 2025 · 2024 to 2026 · 2½ years
Built and ran 450+ Playwright tests and the Node.js tooling behind them; the primary technical reference for Feefo, and the one who finds out why a test failed.

2020 — **Director**
Cymba Racing · rowing boats · 2020 to now · 6 years
Sales, support, logistics, drone footage and the regatta circuit across the UK and Europe.

2020 — **Shopify and WordPress Developer**
Catalyst Global · Silverless · Rouge Media · contracts · 2020 to 2024 · 3½ years
Seven shops launched in three weeks. 20+ WordPress client projects. AI-assisted builds early.

2017 — **Umbraco Web Developer**
Boomerang Creative · Newbury · 2017 to 2020 · 3½ years
Built custom Umbraco sites in C# and .NET, and trained apprentices and clients to run them.

2014 — **Full-stack Developer**
Stanleybet · Liverpool · 2014 to 2016 · 3 years
Turned 100+ static shop-screen templates into data-driven pages, and built a corporate site that lasted a decade.

2010 — **Before the code**
Kitchens in Cyprus, Greece and Crete · a kiosk in Dublin · 2010 to 2013 · 3 years
Busy seasonal kitchens, new teams and languages, then commission sales.

What I bring. The brighter ones I use most.

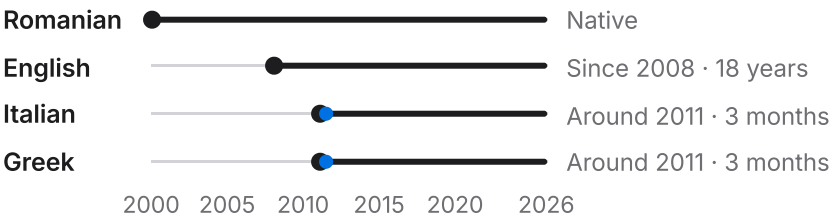

Playwright · TypeScript · JavaScript · Node.js · React · Next.js · AngularJS · PHP · Symfony · .NET Framework · MySQL · MongoDB

HTML · CSS · SCSS · Bootstrap · jQuery · WordPress · Shopify · Umbraco · Git · Google Analytics · Claude Code · SVG

Software architecture · Data modelling · CI/CD · API automation · C# and .NET · Photography

Also: CSS and SCSS, SQL, authentication and role-based access, audit logging, PostgreSQL, Stripe payments, e-commerce, end-to-end testing, Page Object Model, API testing, regression testing, Jira, Agile / Scrum, security review, Railway, Cloudflare, Sentry, AI coding agents, AI-assisted development, SEO

Four languages. When each started, and how long it took.

Education.

B.A.Sc. Power Engineering, Politehnica University of Timișoara
2005 to 2009

Maths and Computer Science, Liceul Diaconovici-Tietz
2001 to 2005

Let's talk.
